

APPS WE LOVE

FirstCaliforniaEscrow

Photo Synth (Free)
<http://photosynth.net>

Allows you to capture 360 degree photos. This app eliminates many of the restrictions you have when using a smart phone camera and allows you to “shoot wraparound panoramas or full ‘synths’.” One of the best things about this app is you can share these views on sites such as Facebook, publish them to Bing Maps or even embed them in your own Web site.

Camera+ (\$1.99)
<http://campl.us>

The cameras in smart phones these days are amazing and Camera+ makes them better. The Camera+ application allows you to manage your photos, add photo info including dimensions, size and GPS location and share them on social media sites. In addition, Camera+ provides you with digital effects to bring out the best in the pictures you take. For example, if the picture is too dark, use the digital flash effect to lighten up the shot.

Evernote (Free)
www.evernote.com

Evernote is a company with a mission to change the way people remember things. Evernote allows you to store notes, audio memos, emails, photos, web pages and documents in one program where you can quickly and easily search for it. Evernotes CEO, Phil Libin describes Evernote as “Google for the web of your life” (Inc. Magazine – December 2011). With Evernote, everything is stored on the web and is easily accessible with your computer, smart phone, or tablet.
